**Kind Attn:** Mr. Harb Al Hanini**Sub: - Sekura Tracking Systems.**

Dear Sir,

1. We have inducted the above tracking system which has been in use for the last 1 year.
2. The addition of your Sekur Track tracking devices to our fleet of vehicles was one of the best things we have done to reduce our costs. We have been able to reduce our fuel consumption dramatically by identifying and eliminating unnecessary movements & idling of vehicles and reducing the occurrences of excess speeding. We can now instantly locate all of our vehicles and equipments. This allows us to deploy them in a most efficient and effective manner.
3. This Tracking system could not have been better for our logistic control. The Sekur-track system has enabled us to ensure that our logistic personnel including the connected vehicles and equipment are more efficiently and effectively deployed. The real time tracking system has improved our vehicles utilization, avoiding wastages, and reducing overtime hours. We have been impressed by the dedicated customer service that ensures confidence in achieving corporate requirements as far as equipment & vehicle usage is concerned.
4. We would like to place on record our appreciation for the reliable and efficient customer service that allowed us to achieve our corporate KRAs, in a more efficient, effective and productive manner, as far as equipment and plant utilization was concerned.
5. We work in areas where most GSM coverage seemed to drop off - but with the Sekur-Track system, we received information and data logons which enabled us to see our vehicle, plants and equipments live all the way up to the point where there was coverage, and get continued information after coming online, with no data loss.
6. This system has indeed effectively and efficiently helped us in monitoring the whole system, leading to leaner operations of the whole fleet and improving the bottom lines of the logistics function, which is the largest expenditure area for an EPC contractor who has to deploy huge resources of vehicles and equipment incurring huge capital costs, where returns are to be minutely monitored.

Thanking You.

Yours Faithfully  
 For TECTON Engineering and Construction LLC

  
 M. David Alexander  
 General Manager - Operations
